

GX-C2 Rub Tester

Application

This instrument tests the abrasion resistance of ink layer of relief printing, light sensitive layer of PS board, and coating layer of other related products. LCD to display test data, easy to use.

Features

1. Touch scree, convenient to operate.
2. Fully automatic operation, one-key operation, auto stop, convenient to operate.
3. Adopt high-precision ball screw parts to make sure the equipment smooth and stable running and long life.
4. Running speed and time could be adjusted to meet different standard request.
5. Solve the problems of poor abrasion resistance and easy falling off of the ink layer of the printed products.
6. Compatible with the abrasion resistance test of the photosensitive layer of the PS plate, could analyze and predict the printing endurance of the PS plate.
7. Inner printer to print report.

Specifications

Item	Technical Parameters
Rub pressure	20±0.2N
Rub speed	43cpm
Rub area	240mm(L) x 50 mm(B)
Rub times	1~999999 times
Sample size	320mm × 50mm (short samples can be joint together)
Instrument size	440mm × 400mm × 200mm
Power	430W
Power supply	AC 220V 50Hz
